

Post Operative Instructions

SUCTION LIPECTOMY ABDOMEN

1. Please take all medications as directed
2. The abdominal binder dressing may be adjusted for comfort

Three days after the operation you may temporarily remove the binder and cotton wool. Do not remove the white steri-strips across the wound(s). You can now shower, and after gently drying the area replace the cotton wool and binder. This can now be done on a daily basis until returning to see your doctor

3. Please rest for the first few days after your operation. You may walk around, but do not engage in any strenuous exercise
4. Avoid putting strain on your abdomen as you would in a “sit up”, ie. sitting straight up from lying down. You will need assistance, or roll onto your side and sit up sideways. Similarly, do not lift heavy objects that cause you to strain
