## Post Operative Instructions

### WOUND CARE

- The local anaesthetic will wear off in a few hours. After that you may need some Panadol
- If there is any bleeding from the wound, please apply firm pressure with clean tissues for 10 minutes. Please have a look at the clock to ensure that the pressure is applied for a full 10 minutes. This is normally enough to stop any minor bleeding, however you may need to repeat this. If bleeding persists, please contact us
- If there is excessive redness, irritation, or any signs of possible infection ring our rooms. If you can't contact the rooms call the after hours number above or see your GP
- If your wound is on your arm, leg or head keep the area elevated
- NO swimming and NO heavy exercise for at least 1 week

### Please follow the instructions below as marked:

- Leave dressing/s dry and intact for 2 days. After this time you may remove the outer dressing and get the white steri strip/s lightly wet. Pat dry. Leave the steri strip/s over the wound until you see Dr. Perkins.
- Leave the steri strip/s dry for 2 days. After this time you may get the steri strip/s lightly wet. Leave the steri strip/s over the wound until you see Dr. Perkins.
- Leave the Comfeel dressing dry for 2 days. After this time you may get the Comfeel dressing lightly wet. Pat dry. Leave the Comfeel dressing on until you see Dr. Perkins.
- Leave dressing/s dry and intact for \_\_\_\_ days. After this time you may remove the dressing/s and shower. Don't rub the wound vigorously. Pat dry, and you may leave the wound uncovered.
- Leave the wound dry for 24 hours. After this time you may get the wound lightly wet. Apply Vaseline 2 – 3 times a day. Always clean off old Vaseline before reapplying.
- Leave dressing/s dry and intact until seen by Dr. Perkins.
